TOPICS

SPS - Scania Production System

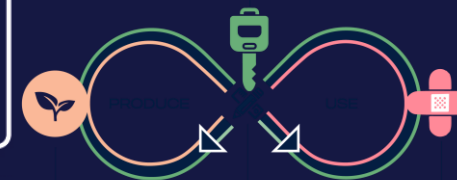

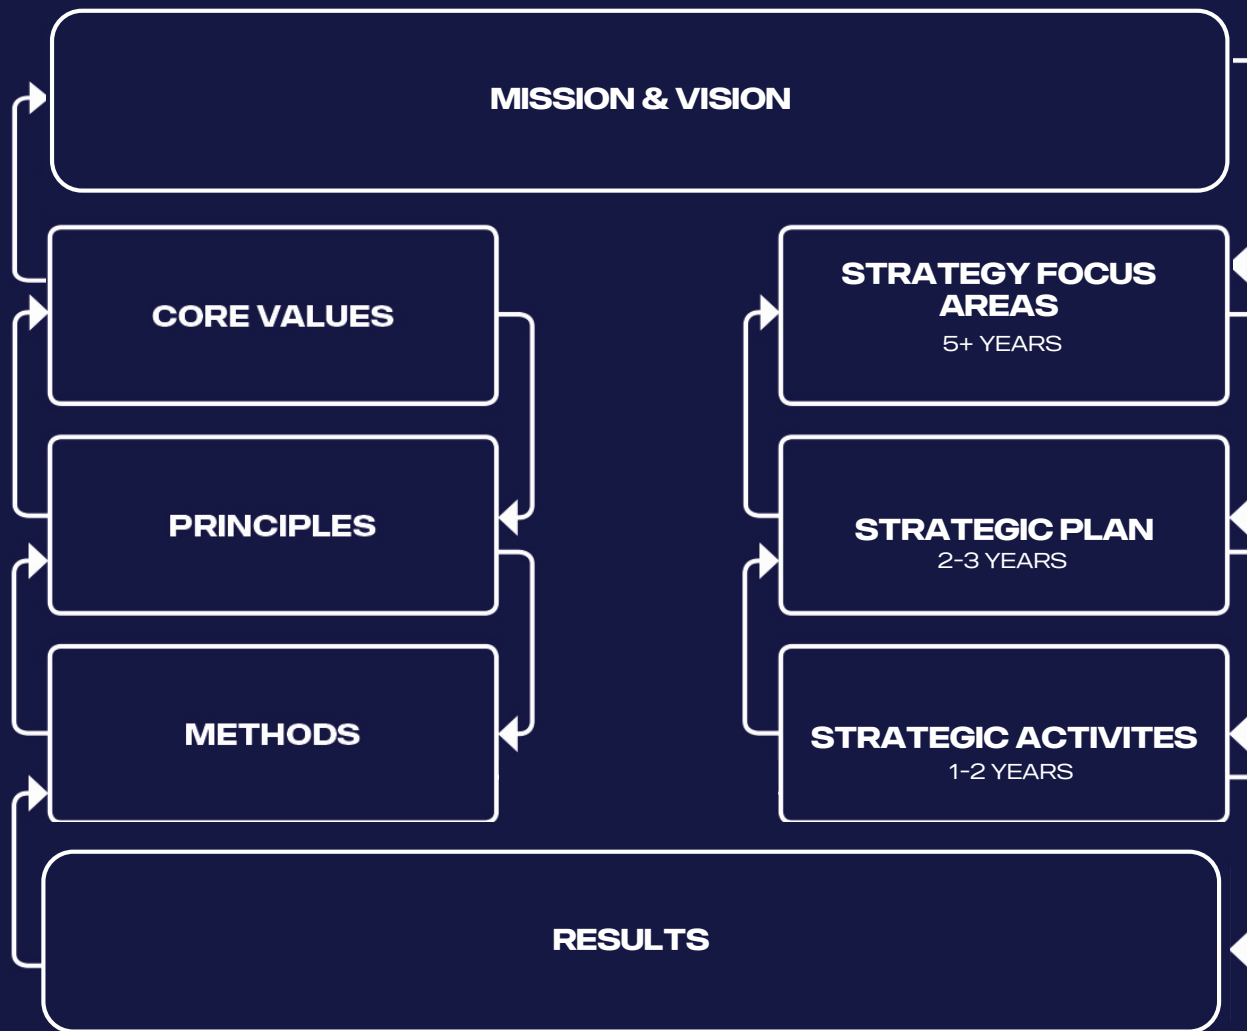

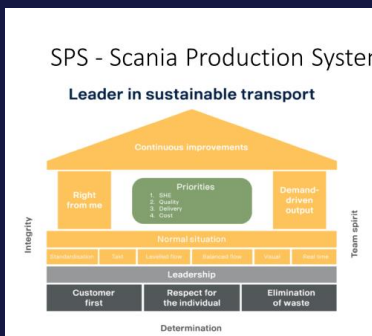

Leader in sustainable transport

extended

THE THINKING MODEL

PROCESS

CO₂ industrial operations

50% CO₂ reductions from own by 2025 (2015)
+
100% of our operations run on fossil free electricity by 2020

CO₂ land transports

50% CO₂ reductions from land transports by 2025 (2015)

1 Prevention

Get it right from the start!

Preventing the creation of waste and minimize the amount.

Phase out hazardous substances

2 Reuse

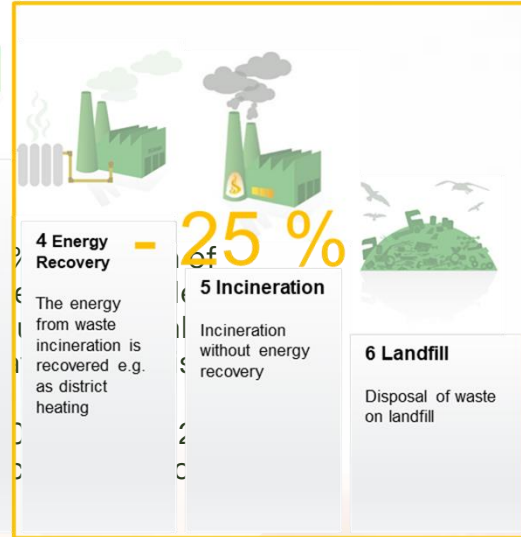

Use as many times as possible

3 Recycling

Recycle the waste into a new substance or product

Waste material not recycled per vehicle - 25 % 2015-2020

Energy use

25% less energy per vehicle* in our industrial operations by 2025 (2015)

Water

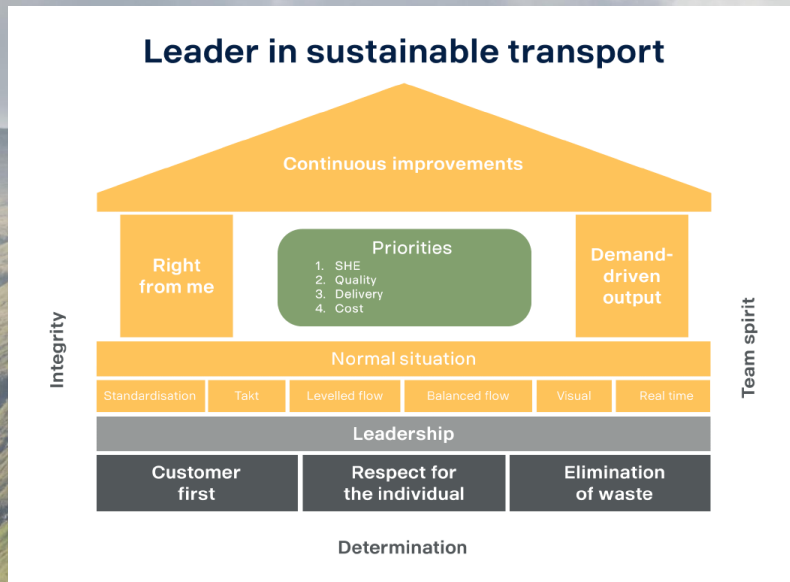

40% reduction of water use per vehicle
*by 2025 (2015)
